PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience architecting, building, and deploying scalable cross-platform mobile applications for Android, iOS, and Web. Proven track record shipping 15+ production apps to the Google Play Store and Apple App Store, spanning real-time communication, fintech-adjacent payments, transport ticketing, and document processing domains. Skilled in Dart, Flutter, Firebase, REST API integration, and state management (GetX, Provider, Riverpod, BLoC), with deep expertise in Clean Architecture, SOLID principles, and offline-first system design. Experienced across the full mobile development lifecycle — from architecture decisions and CI/CD automation to App Store/Play Store publishing and post-launch performance optimization — within Agile teams.

CORE TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, Kotlin, Java, Jetpack Compose

State Management: GetX, BLoC, Provider, Riverpod

Backend & Storage: Firebase, Supabase, REST APIs, Socket.io, SQLite, Hive, Shared Preferences, Get Storage

Backend Development: Java, Spring Boot, RESTful API Design

Databases: PostgreSQL, MySQL, SQL Server, Firebase Firestore, SQLite

DevOps & Containers: Docker

Real-Time & Media: WebRTC, Agora, 100ms, ZegoCloud, Audio/Video Calling, Live Streaming, WebSocket, Streams

Maps & Sensors: Google Maps API, Gyroscope, Accelerometer, Sensor APIs, Geolocator

Payments & Auth: Stripe, In-App Subscriptions, RevenueCat, Bank Payment Gateways, SSLCommerz

Platform Integration: Method Channels, Platform Channels

Architecture & Design Patterns: Clean Architecture, MVVM, MVC, SOLID Principles, Dependency Injection, Microservices Architecture, Offline-First Architecture

CI/CD & Automation: Fastlane, GitHub Actions, Bitrise, Codemagic

Security: OAuth 2.0, JWT, SSL Pinning, ProGuard/App Obfuscation, Data Encryption

Observability & Performance: Flutter DevTools (Memory/CPU Profiling), Crashlytics, Sentry, Datadog

Testing: Unit Testing, Widget Testing, Integration Testing, TDD, BDD, Patrol, Appium, Maestro

Tools & Practices: Git, CI/CD, App Store & Play Store Publishing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer (Flutter Developer) | Prime Tech Solutions Ltd — Dhaka, Bangladesh *Feb 2024 – Present*

- Architect and develop scalable, high-performance Flutter mobile applications, owning technical decisions across the full development lifecycle from design through production deployment.
- Led the development and successful launch of 4 enterprise and consumer applications — TULO, PTSL Time Tracking System, Cosmos Holiday, and Buy Tickets BD — coordinating feature delivery within Agile sprints.
- Engineered intuitive, high-performance UI ensuring seamless cross-device compatibility and optimized rendering performance across varied screen sizes and OS versions.
- Implemented Clean Architecture, SOLID principles, and robust state management (BLoC, Riverpod) to improve code scalability, modularity, and long-term maintainability across multiple codebases.
- Optimized hardware-level APIs (CameraX) to enable low-latency, real-time frame processing, and engineered secure URL-parsing mechanisms to mitigate malicious redirect risks.
- Owned the end-to-end deployment lifecycle on Google Play Console, executing App Store Optimization (ASO) strategies that improved organic discoverability.
- Designed, built, and shipped production-ready Android applications from the ground up, from initial architecture through public release.

Junior Software Engineer | Clipping World Ltd — Nikunja, Dhaka, Bangladesh

May 2023 – Dec 2023

- Developed 4 high-impact utility mobile applications for document management and scanning — PDF Converter, PDF Scanner, QR & Barcode Scanner, and Document Scanner — each shipped to production.
- Designed intuitive UI/UX and optimized application performance to deliver seamless multi-device compatibility, improving end-user productivity and retention.
- Optimized the Flutter front-end architecture to ensure smooth, responsive cross-platform performance across both iOS and Android ecosystems.

Intern Software Engineer | Code Studio — Rajshahi, Bangladesh

Feb 2023 – May 2023

- Built high-performance Android and iOS applications using Dart and the Flutter SDK under senior engineer mentorship.
- Gained hands-on experience in UI/UX implementation, third-party API integration, and Firebase backend services, delivering stable, user-centric mobile applications.

KEY PROJECTS

Paribahan — Transport & Ticketing Platform

- Engineered end-to-end intercity ticketing workflows including real-time seat maps with seat-locking mechanics, multi-city route filtering, QR-code e-ticket generation, and multi-gateway mobile payment integration.
- Optimized API polling and schedule synchronization, eliminating concurrent double-booking conflicts during peak sales and reducing checkout drop-off.

LazyTasks — Task & Productivity Manager

- Built a modular task management system with customizable category tagging, priority levels, sub-task breakdowns, and local alarm-driven recurring push notifications.
- Implemented offline-first architecture with local persistence (SQLite/Hive), enabling zero-latency UI updates, background scheduling, and seamless sync on reconnection.

Flights Nepal — Flight Booking & Travel App

- Developed an interactive flight search engine with multi-airline REST API integrations, multi-currency fare comparison, dynamic seat selection, and automated digital receipts.
- Implemented smart API response caching and resilient error-handling fallbacks, reducing flight search latency by 35% and maintaining booking continuity on low-speed networks.

PDF & Document Scanner / Converter Suite

- Engineered a document management suite with high-speed multi-page camera scanning, dynamic edge detection with perspective cropping, image enhancement filters, PDF compression, and OCR text extraction.
- Optimized the background image processing pipeline to eliminate UI lag during multi-page processing, reducing generated PDF file sizes by up to 40% without sacrificing clarity.

QR & Barcode Scanner / Generator

- Built an all-in-one utility for instant 1D/2D code scanning and generation (Wi-Fi, URLs, contacts) with scan history, dark/light themes, and one-tap clipboard actions, using Clean Architecture and BLoC/Riverpod.
- Fine-tuned CameraX configurations for low-latency frame decoding in low-light conditions and embedded a secure URL parser to block malicious redirects without intrusive permissions.

TubeMate — Background Audio Player

- Developed a background audio engine enabling continuous playback for videos, podcasts, and audiobooks when the app is minimized or screen-locked, with media bookmarking and a customizable sleep timer.
- Integrated Android MediaSession APIs for lock-screen media controls and optimized foreground services, reducing background CPU and battery consumption by 25%.

EasyCast — Cross-Platform Screen Mirroring Utility

- Built a low-latency screen mirroring and control utility for PC and mobile via USB/Wi-Fi, with a built-in media downloader supporting up to 4K/8K resolution and flexible storage routing.
- Developed a smart format-filtering engine that eliminates corrupted streams and estimates file sizes pre-download, while resolving long-session disconnection issues.

QADR — Islamic Lifestyle Platform

- Built a comprehensive application combining background Quran audio streaming, location-based prayer time calculation, a dynamic digital Qibla compass, mosque locators, a digital Tasbeeh counter, and integrated LMS/eCommerce modules.

- Streamlined RESTful API data fetching and state management across all core modules, ensuring high responsiveness and low memory consumption on Android and iOS.

EDUCATION

BSc in Computer Science & Engineering (CSE)

Uttara University, Uttara, Dhaka, Bangladesh — Apr 2019 – Apr 2023

Thesis: Ecommerce Platform built with React JS, Spring Boot, and PostgreSQL

Higher Secondary Certificate (Science)

Gazipur Presidency College, Board Bazar, Gazipur, Dhaka, Bangladesh — Jul 2016 – Apr 2018

LANGUAGES

Bengali — Native | English — Professional Working Proficiency
